

JWS WASTE & RECYCLING SERVICES LTD

COLLECTION PROCEDURES And DRIVER'S HANDBOOK

We have introduced these procedures because we feel that it is important to provide a safe working environment for all of our staff and because we take our environmental responsibilities very seriously and are continually striving to minimise our environmental impact.

These procedures cover the activities of our collection fleet and have been produced to make sure that we collect waste in a safe, environmentally secure and efficient fashion.

They are the common sense rules by which we should operate our vehicles and by which waste should be collected; through following them we can be confident that we will work in a safer workplace and that we are not breaking any environmental or health and safety laws.

Please read these procedures and keep them in the vehicle you are responsible for.

Your co-operation in the operation of these procedures is essential and will be greatly appreciated.

Contents

1	RULES FOR ALL DRIVERS	4
1.1	APPROVED DRIVERS	4
